

Biology

Associate in Science Degree

Why Biology?

Biology is a broad field that can lead to many different career paths, including education, zoology, health professions, ecology, biotechnology, microbiology, botany, and marine biology. A generalist biology degree is primarily for future educators and students uncertain about which biology sub-discipline he or she would like to pursue. Students interested in the health professions often major in biology. Health professions include medicine, pharmacy, physical therapy, veterinary medicine, dentistry, optometry and more.

Why Bay College?

The Biology program at Bay College provides a solid foundation for further study in a more specialized area. Bay College offers students interested in Biology a few different degree options, as well as a variety of Biology courses. Visit our academic pages covering Pre-Professional Health, Molecular Biotechnology, and Natural Resources to learn about our specialized programs. Class sizes are small, and students get lots of individual attention.

Beyond Bay College

Students interested in transferring to a four-year institution to obtain a bachelor's degree or higher may find opportunities in the following areas of study:

- **Biology**
- **Biochemistry**
- **Biomedical Engineering**
- **Marine Biology**
- **Geology**
- **Botany**
- **Zoology**
- **Ecology**
- **Education**
