

Computed Tomography Technologist Certificate

Why Computed Tomography Technologist?

Computed Tomography Technologists are highly skilled professionals trained to operate CT equipment, which produces cross-sectional images of patients' bones, organs and tissue that are used to diagnose medical conditions in medical facilities and outpatient centers under the direct supervision of a health care provider. The CT program is designed not only to foster the skills and knowledge necessary for competent practice, but also places emphasis on professional attitudes, values and behaviors that encourage the professional growth of the individual student. Clinical learning experiences are provided by affiliating hospitals, clinics and other outpatient facilities. Didactic learning experiences occur in supportive college course work delivered through an online environment. Both are equally important to the development of the competent CT Technologist.
